

Serving the Texas, Louisiana, Oklahoma and Arkansas markets as a professional sales and marketing team since 1997, The Ascend Group represents quality manufacturers of Structured Cabling, IT Infrastructure, Data Center and Security Products.

Our staff of trained and industry seasoned professionals has over one hundred years of combined experience and have participated in the dynamic growth and changes that have occurred in our market. From the varying LAN architectures of the 80's to 10/100 Megabit Ethernet of the 90's to today's emerging Wireless and multi Gigabit platforms as well as the convergence of voice, security, building automation and process control functions into the IP network architecture, members of our team are able to offer unique insight and perspective.

The Manufacturers we represent are recognized worldwide as industry leaders with product designs and enhancements that separate them from the competition.

As many firms upgrade their voice, data and security infrastructure, our company is positioned to offer solutions and product support to critical information users in many different market segments including financial, medical, educational, defense and aerospace, insurance, distribution, and installation companies.

Our network of Distribution and Certified Installer Partners ensure prompt access to all of our products and a knowledgeable, qualified installation staff to ensure the above the standards performance they were designed to provide.

Our purpose is to be knowledgeable of emerging standards and technology improvements to assist network customers with their next generation technologies and provide cost effective solutions as the diverse global Information Technology community implements the high speed, multi function networks of tomorrow.
